Technical Skills

Project Delivery: Requirements Gathering, Stakeholder Coordination, Scope Planning, Agile (Scrum/Kanban)

Product & Quality: User Flows, Use Cases, Feature Definition, Functional Testing, Usability Validation

Development: TypeScript, JavaScript, Python, React, Next.js, React Native (Expo), Node.js, Express.js, REST APIs

Databases & Tools: Firebase, PostgreSQL, Git, GitHub, Figma, Jest

Education

Central Philippine University Iloilo City, Philippines

BS in Software Engineering 2026

- **Leadership Awardee** and **Innovation and Pitching Excellence Awardee**

Experience

Wisdomous

Technical Project Manager 2025 – 2026

- Gathered requirements from government office stakeholders for a **budgeting application supporting PHP 5M+ in annual budgets**, translating business needs into features.
- Mapped **user flows and use cases**, suggested features, and coordinated with developers to meet **client priorities and quality standards**.

Habôl: Hablon Color & Pattern Simulator (DTI Iloilo)

Software Project Lead & Quality Assurance Coordinator 2024 – 2025

- Coordinated delivery of a **Next.js, React Native (Expo), and Firebase** application with **Jest testing**, designed for **300+ regional weavers** to visualize hablon color combinations; now in use.
- Worked with **clients and developers** to translate business needs into workflows and validate functionality, usability, and delivery standards.

Reelist8

Product Design & Software Quality Assurance 2026

- Designed pages and workflows for **Sales Corps** (agent onboarding, listing reviews, referrals, earnings) and **PropertyAuctions.ph** (hybrid real estate auctions).
- Reviewed **data accuracy, usability, and workflows** at a real estate startup whose bank-partnered auction platform included an announced **26-property portfolio valued at PHP 500M+**.

CartmanPH (XzenTech)

Software Quality Assurance & Delivery Support 2026

- Reviewed ordering and driver workflows for a **grocery, food, and goods delivery application** intended for a municipality of **60,000+ residents**.
- Identified **functional and usability issues** and relayed improvements to support reliable software delivery.

Leadership & Recognition

President, Philippine Society of Software Engineers – CPU 2024 – 2025

- Led a **149-member organization**, coordinating teams, budgets, and educational programs reaching **20–100 students per event**.

Champion, Philippine Blockchain Week – iThink Hackathon 2025

- Won **1st place among 50+ teams** nationally with **Numerus**, an AI-assisted mathematics practice prototype.

Projects

Beyond the Barrier – Solo Developer 2026

- Developed a **mathematics learning game** for elementary pupils using **Godot, GDScript, and Aseprite**.

pAperSim – Team Member 2026

- Contributed to the **product vision, discussions, and docs** of an AI teaching-simulation playground; tested the app.

Numerus – Team Member 2025

- Contributed to the **product vision and docs** of a hackathon-winning AI math app; built its home page and tested it.
